Introduction

About This Course	2
Prerequisites	2
Course Design Philosophy	2
Using this Book	2
About the Training Files	3
Windows® 7	3
Conventions Used in this Book	3
Use of Color	4
More SOLIDWORKS Training Resources	4
Local User Groups	4
Injection Molding	5
Fill Stage	5
Pack Stage	6
Cool Stage	6
Ejection	6
SOLIDWORKS Plastics Simulation	7
SOLIDWORKS Plastics Standard	8
SOLIDWORKS Plastics Professional	8
SOLIDWORKS Plastics Premium	8
This Course	8

Lesson 1: Basic Flow Analysis

Basic Flow Analysis	10
Stages in the Process	10
Units	12
Element Types	13
Shell Elements	13
Solid Elements	13
Manual or Automatic	13
Meshing	15
The PlasticsManager Tree	18
Material	19
Polymer	19
Using the Databases	20
Machines	20
Injection Location	21
Running a Flow Analysis	22
Flow	22
Pack	22
Warp	22
Cool	22
Flow Results	23
Fill Time	24
Weld Lines	26
Results Adviser	27
Exercise 1: Basic Flow Analysis	29

Lesson 2: Detecting a Short Shot

Detecting Short Shots	34
Stages in the Process	34
Fill Settings	35
Definition Fill Setting Parameters	36
Filling Time and Injection Pressure Considerations	36
Report Text File	38
Flow Front Central Temperature	39
Pressure at End of Fill	40
Design Changes	41
Plastics to Modeling	41
Modeling to Plastics	41
Thickness Change	41
Simulations After Design Changes	42
Exercise 2: Short Shots	44

Lesson 3: Automation Tools

Automation Tools	50
Stages in the Process	50
Duplicate Study	51
Copying Settings	52
Plastics File Management	52
Batch Manager	53
Batch Controls	53
Summary and Report	55
Exercise 3: Design Changes	59

Lesson 4: Injection Locations and Sink Marks

Injection Locations and Sink Marks	62
Stages in the Process	62
Injection Location Rules	64
Positioning the Injection Location	64
Single vs. Multiple Injection Locations	64
Modeling for Injection Locations	65
Automatic Injection Location Selection	65
Predict Flow Pattern	65
Sink Marks	68
Measure	69
Minimizing Sink Marks in Ribs	70
Nominal Wall Thickness Advisor	72
Exercise 4: Minimizing Sink Marks (1)	73
Exercise 5: Minimizing Sink Marks (2)	77

Lesson 5: Materials

Material Properties	80
Stages in the Process	80
User-defined Database	81
Material	81
Resin Properties	82
Temperature Properties	83
Melt Temperature	83
Mold Temperature	83
Part Ejection Temperature	83
Glass Transition Temperature	83
Heat Transfer Properties	84
Specific Heat	84
Thermal Conductivity	84

Viscosity 85
 PVT Data 86
 Mechanical Properties. 87
 Thermal Expansion Coefficient 87
 Elastic Modulus 87
 Poisson’s Ratio 87

**Lesson 6:
 Mesh Manipulation**

Mesh Manipulation. 90
 Stages in the Process. 90
 Local Refinement of Mesh 93
 Mesh Density 93
 Gradation 93
 Element Issues 96
 Mesh Editing. 97
 Mesh 97
 Mesh Analysis. 98
 Mesh Triangles 98
 Mesh Nodes 98
 Leader Lines 101
 Solid Mesh 103
 Solid and Shell Mesh 103
 Solid Mesh Types 103
 Tetrahedral Elements 104
 Hexahedral Elements 105
 Exercise 6: Mesh Repairs 110

**Lesson 7:
 Detecting Air Traps**

Detecting Air Traps. 116
 Stages in the Process. 116
 Air Traps 118
 Dieseling Effect 118
 Plot Ranges 118
 Thickness Analysis 119
 Venting 122
 Venting Analysis. 122
 Venting Locations. 122
 Exercise 7: Air Traps 126

Lesson 8: Gate Blush

Gate Blush.	132
Stages in the Process.	132
Runner Elements.	133
Domains	133
Gate Blush.	134
Shear Stress.	134
Reducing Gate Blush	134

Lesson 9: Packing and Cooling Times

Packing and Cooling.	140
Stages in the Process.	140
Flow/Pack Switch.	141
Pack Stage.	141
Pack Settings.	142
Pack Analysis	142
Pack Results	143
X-Y Plot	143
Volumetric Shrinkage at End of Packing	145
Cooling Times.	147
Temperature at Post-Filling End.	147
Nodal Temperature	148
Exercise 8: Packing and Cooling Times.	150

Lesson 10: Reducing Cooling Times

Reducing Cooling Time	154
Stages in the Process.	154
Multiple Injection Locations.	156
Clipping Plane Mode	163
Jetting	166
Exercise 9: Optimizing Cooling Time	167

Lesson 11:**Multiple Cavity Molds**

Multiple Cavity Molds	172
Stages in the Process	172
Mold Layouts	173
Channel Design	175
Runner Channel Design	175
Runner Types	176
Element Count	176
Searching for Polymers	178
Runner Wizard Channel Design	182
Family Mold Layout	184
Using Runner-Balancing	187
Exercise 10: Multiple Cavity Molds	191
Exercise 11: Runner-Balancing	193

Lesson 12:**Symmetry Analysis**

Symmetry Analysis	196
Stages in the Process	196
Case Study1:	196
Case Study2	201
Symmetry Face	202

Lesson 13:**Valve Gates and Hot Runners**

Valve Gates and Hot Runners	206
Stages in the Process	206
Hot Runners	207
Valve Gates	208

Lesson 14:**Reaction Injection Molding**

Reaction Injection Molding	212
Stages in the Process	212
Reaction Injection Molding	213

Lesson 15:**Using Inserts**

Using Inserts	218
Stages in the Process	218
Cavities and Inserts	219
Materials for Inserts	221
Insert Settings	223
Hiding Cavities and Inserts	225

Lesson 16: Multi Shot Mold

Multi Shot Mold	230
Stages in the Process	230
Multi Shot Mold	231
Domain Order	231

Lesson 17: Gas Assistance Molding

Using Inserts	236
Stages in the Process	236
Gas Assist	237
Material Selection	237

Lesson 18: Cooling Analysis

Cooling Analysis	244
Stages in the Process	244
Cooling	245
Cooling Channels and Mold Bodies	245
Coolant	248
Mold	248
Cool Settings	250
Cooling Simulations	251
Cool Flow Field	251
Cool Pipe	251
Coolant Entrance	251
Mold Wall Temperature	251
Cool Analysis	253
Cool	253
Cool Results	254
Baffle	256
Bubbler	257
Exercise 12: Cooling Analysis	262

Lesson 19: Warpage Analysis

Warpage Analysis	264
Stages in the Process	264
Shrinkage	269
Reducing Shrinkage	269
Warpage	269
Warp Settings	269
Warp Results	270
Reducing and Fixing Warped Parts	273
Thermal Contributions to Warping	273
Typical Warp Shapes	273
Residual Stress	277
