WOODWORKING CAD/CAM SOFTWARE

...TO MANUFACTURING

WHAT IS SWOOD?

SWOOD is a woodworking CAD/CAM software which is integrated within SOLIDWORKS. As a SOLIDWORKS certified Gold Product, the SWOOD portfolio provides five complete solutions from design to manufacturing that speeds up any wood projects.

- **CAD/CAM expertise**
For more than 30 years
- **Team of professionals**
Dedicated to woodworking market
- **Scalable and adaptive solution**
New updates every year
- **Network of certified resellers**
In more than 55 countries

DISCOVER SWOOD PORTFOLIO

DESIGN

SWOOD Design deals with the efficiency of the design process. It allows quick and easy design of your projects within a parametric 3D environment.

CAM

SWOOD CAM deals with CNC machines and their specific technology. It allows to link your design with your woodworking CNC machines by automatically creating programs and production documents.

NESTING

SWOOD Nesting is a bolt-on to SWOOD CAM. It allows to nest and optimize projects parts onto a wood board to reduce material waste.

CENTER

SWOOD Center, linked to one of your company's databases is a configurator that allows mass customization on design and production.

BW

SWOOD BW (Beam & Wall) is a software dedicated to timber and frame construction. Automatically export your CNC programs.

WHY CHOOSE SWOOD?

Top reasons to choose our solutions!

- Time saving
- Improved productivity
- Reinforced expertise
- Easy collaboration
- Shorter design cycle
- Competitive advantage

SWOOD, FOR WHO?

Are you a professional woodworker?
Adaptable solution for everyone

Company size

- Large enterprises
- Small and midsize businesses

Type of market

- Furniture
- Shopfitting
- Vehicle & yacht fitting
- Kitchen
- Bathroom
- And much more!
